

HOPLEYS® OPEN WEB STEEL JOISTS

Our unique, lightweight, open web steel joists are manufactured from high-grade steel and require no maintenance. Their ability to be used without fear of shrinking, warping or stability problems make them an ideal solution for the building and construction industry. Manufactured in a range of sizes their open web design allows pass through services greatly optimising floor to ceiling heights in multi-storey construction.

Hunt Engineering & Staff have an in house design team including engineers and draftsmen ready to create cost effective solutions for your next project.

Dedicated to Quality and Service

Hunt Engineering & Staff P/L is made up of self contained divisions, each with compatible manufacturing and professional skill sets. The wide range of product designs, skills and modern facilities, all brought together under the one umbrella, enable the company to manage diverse major projects.

Today, the groups' manufactured products encompass water storage tanks for the process industries and fire fighting services, laser cutting for commercial, industrial, domestic, architectural and automotive, general and specialised sheetmetal fabrication 'made to order' and our unique open web steel joists for use in the building and construction industry.

HUNT ENGINEERING

HUNT LASERCUT

Commencing business in 1992 and staffed by highly trained specialists, Hunt Lasercut provides a versatile laser cutting service to a diverse group of industries. We cut a wide range of materials including steel, stainless steel, aluminium, plastics and timber.

We offer a total service including the supply of material, computerised nesting of parts and delivery to your premises.

Under the Hunt umbrella we can also provide fabrication or arrange for special coatings to supply a complete component for our customers. Hunt Lasercut is proud to be an applicant for ISO 9001:2000.

TANK INDUSTRIES

Water Storage Tanks

Tank Industries design, manufacture, install and service a full range of water tanks for the fire, hydraulic, water authorities and process industries. In addition, they design and build tanks for the aquacultural and agricultural industries together with water storage solutions for mining sites or other waste water situations.

The range consists of circular, rectangular panel, liner or custom built to the clients specific requirements.

Material options include Stainless Steel, Galvanised, Powdercoated and BHP 'Marviplate' construction.

HOPLEYS SHEETMETAL

In over 70 years of operation Hopleys have earned a solid reputation for excellence in sheetmetal and engineering. It is the developer of the Hopleys Open Web Steel Joists and as well as having a wide range of products Hopleys can design, manufacture and install anything in sheetmetal, general steel or stainless steel, large or small.

The Hunt Lasercut division compliments many projects undertaken by Hopleys and vice versa, giving us the ability to cut and fold in-house.
